

PORTREATH PC JUNE 2024

It is only a couple of weeks since my last report, therefore this is a very short one.

Firstly, the WAFF Site, as of today there is no further update apart from discussions are still ongoing between Planning and Classic Builders and the advantage of this is that Classic cannot go to the Inspector and appeal against non-determination.

On the 26 June there will be a roadshow by South West Water which will include the proposed expenditure of £150,000 and the venue and timing should be confirmed within the next couple of days. I did ask if this was still going ahead because of the number events that are cancelled over the next month because of the General Election as some people may wish to make this a political event.

During discussions it was confirmed that there were discharges of mainly surface water during all of the bad weather and all were authorised by the Environment Agency and the regular checks carried out on the usual ebb tides in Portreath the standard was between good and excellent.
