We're changing the price of your Flexible Octopus Business tariff

Hi Lucy,

As you've probably heard, energy prices are rising. The conflict in the Middle East is a big factor in this. It's affecting just about everyone - including British businesses like yours.

The war has reduced the amount of oil and gas available globally, making them more expensive. In the UK, gas sets the price for much of our electricity. So, the cost of all power from the grid has gone up.

As a result, your energy rates are increasing too. They'll change on Monday 1st June.

We know this isn't great news to hear. With all this going on, we're working hard to keep your costs as fair as possible:

- We're still offering new fixed contracts, for businesses that want more certainty (we know lots of suppliers aren't doing this at the moment)
- We're giving all our non-fixed customers, like you, the fairest variable rate we can
- We're making sure our prices are among the most competitive out there
- As always, we're not adding any hidden fees or costs to your bill

We've written a blog about the conflict and how it affects you. We'll keep it up to date as things progress.

www.octopus.energy/blog/for-businesses-conflict-middle-east-energy

You can find a breakdown of your new unit rates and standing charges below.
